

# ROBOT MANIPULATOR & CONTROLLER REPAIRS

Radwell installs robotic equipment to facilitate system verification for a wide range of robotic components. Electric devices related to robot capabilities include amplifiers, communication devices, power supplies, drive units, motors, boards and operator interfaces.

Below is a brief overview of the robotic equipment that our engineering team utilises.

**Yaskawa:**  
MRC Control  
Sk16

**Kawasaki:**  
D+

**Comau:**  
C3G

**ABB:**  
S4C+  
S3  
S4  
IRB 1400  
IRC5  
IRB 2600
